# FEATURES

---

This liquid crystal projector is used to project various computer signals as well as NTSC / PAL / SECAM video signals onto a screen. Little space is required for installation and large images can easily be realized.

## **Outstanding Brightness**

The UHB lamp and high-efficiency optical system assure a high level of brightness.

## **Partial Magnification Function**

Interesting parts of images can be magnified for closer viewing.

## **Distortion Correction Function**

Distortion-free images are quickly available.

## **Extra-low Noise Function**

Acoustic noise level from the unit can be reduced.

☞ These functions work when the mouse control function is activated. Remember, the POSITION, VOLUME, KEYSTONE, BLANK ON and MENU ON functions disable the mouse control function.

**NOTE** • Keep the remote control transmitter away from children and pets.

- Do not give the remote control transmitter any physical impact. Take care not to drop.
- Do not place the heavy objects on the remote control transmitter.
- Do not wet the remote control transmitter or place it on any wet object.
- Do not place the remote control transmitter close to the cooling fan of the projector.
- Do not disassemble the remote control transmitter.

# BEFORE USE (continued)

## Loading the Battery

### First Loading:

In original packing, the battery is installed in the battery holder of the remote controller with protection film (the transparent film some of which is inside the battery folder). Pull out the protection film to load the battery.

### Replacing:

1. See the reverse side of the remote controller.
2. Pinch the groove and pull out battery holder as the drawing right.
3. Remove the worn battery.
4. Install the new battery with "+" side facing.
5. Push in and click the battery holder.

**CAUTION** • Incorrect handling of the battery could result in fire or personal injury.

The battery may explode if not handled properly. Be careful in handling the battery according to instructions both the "Product Safety Guide" and this manual.

- Use the 3V micro lithium battery type no.CR2025 only.
- When loading the battery, make sure the plus and minus terminals are correctly oriented as indicated in the remote controller.
- When you dispose the battery, you should obey the law in the relative area or country.
- Keep the battery away from children and pets.
- When not to be used for an extended period, remove the battery from the remote controller.

### NOTE

Replace the batteries when remote control transmitter operation becomes difficult.

## Fixing the Handle

Fix the enclosed handle if you need.

1. Raise up the handle hook, and pass one end of the handle through the hole of handle hook.
2. Buckle the end of the handle, as the right drawing.
3. Fix the other end of the handle to the other handle hook in the same way.

**CAUTION** • Make sure the handle is fixed before carrying the projector with the handle. If the projector should be dropped from the handle should be off, it could result in an injury, and continued use could result in fire or electrical shock. Do not flourish the projector with the handle.

# INSTALLATION

## Installation of the Projector and Screen

Refer to the drawing and table below for determining the screen size and projection distance.

The projection distances shown in the table below are for full size (800 x 600 dots).

a: Distance from the projector to the screen. ( $\pm 10\%$ )

**Table 1. Installation Reference**

Screen size [inches (m)]	a [inches (m)]	
	Min.	Max.
40 (1.0)	47 (1.2)	55 (1.4)
60 (1.5)	71 (1.8)	87 (2.2)
80 (2.0)	95 (2.4)	114 (2.9)
100 (2.5)	118 (3.0)	142 (3.6)
120 (3.0)	142 (3.6)	173 (4.4)
150 (3.8)	177 (4.5)	213 (5.4)
200 (5.0)	240 (6.1)	288 (7.3)

**CAUTION** • Install the projector in a suitable environment according to instructions of the “Product Safety Guide” and this manual.

- When you fix this unit with a metal tool and the like, you must connect it with ground wire; otherwise, fire or electric shock can result.

Connect the ground terminal of AC inlet of this unit with the ground terminal provided at the building using an optional three-core power-supply cord.

- Please basically use liquid crystal projector at the horizontal position. If you use liquid crystal projector by the lens up position, the lens down position and the side up position, this may cause the heat inside to build up and cause damage. Be especially careful not to install it with ventilation holes blocked.
- Do not install LCD projector in smoke effected environment. Smoke residue may buildup on critical parts (i.e.LCD panel, Lens Assy etc.).

## Angle Adjustment

Use the foot adjusters on the bottom of the projector to adjust the projection angle. It is variable within 0° to 9° approximately.

Foot Adjuster

Press the foot adjuster button

Rear Foot Adjuster

1. Lift up the front side of the projector, and pressing the foot adjuster button, adjust the projection angle.
2. Release the button to lock at the desired angle.
3. Use the rear foot adjuster to adjust the left-right slope. Do not force the foot adjuster screws. This could damage the adjusters or cause the lock to fail.

**CAUTION** • Do not release the foot adjuster button unless the projector is being held; otherwise, the projector could overturn or fingers could get caught and cause personal injury.

# INSTALLATION (continued)

## Cabling

Refer to the table below for connecting each terminal of the projector to a device.

**Table 2. Cabling**

Audio input (from video equipment)	<b>AUDIO IN L</b>	Video/Audio cable or Audio cable with RCA jack
	<b>AUDIO IN R</b>	
Audio output	<b>AUDIO OUT</b>	Audio cable with stereo mini jack

**CAUTION** • Incorrect connecting could result in fire or electrical shock. Please read this manual and the “Product Safety Guide”.

- Before connecting, turn off to all devices to be connected, except for the USB cable.
- The cables may have to be used with the core set to the projector side. Use the cables which are included with the projector or specified.

**NOTE** • Before connecting, read instruction manuals of the devices to be connected, and make sure that the projector is compatible with the device.

- Secure the screws on the connectors and tighten.
- For some RGB input modes, the optional Mac adapter is necessary.
- Some computers may have multiple display screen modes. Use of some of these modes will not be possible with this projector.
- Refer to the “TECHNICAL” section for the pin assignment of connectors and RS-232C communication data.

# INSTALLATION (continued)

## Power Connection

Use the correct power cord depending on the power outlet to be used.

Connect the AC inlet of the projector to the power outlet firmly by the power cord.

**⚠ CAUTION** • Be careful in handling the power cord according to instructions of the "Product Safety Guide" and this manual.  
• Connect the power cord firmly. Avoid using a loose, unsound outlet or failed contact.

## Example of System Setup

**NOTE** • When connecting with a notebook computer, set the proper RGB external image output (setting CRT display or simultaneous display of LCD and CRT). Please read instruction manual of the notebook for more information.

## Plug & Play

This projector is VESA DDC 1/2B compatible. Plug & play is possible by connecting to a computer that is VESA DDC (Display Data Channel) compatible.

Please use this function by connecting the VGA cable with RGB IN 1 terminal (DDC 1/2B compatible). Plug & play may not operate by other connections.

**NOTE** • Plug & play is a system configured with peripheral equipment including a computer, display and an operating system.

- This projector is recognized as a plug & play monitor. Use the standard display drivers.
- Plug & play may not operate by the computer to connect. Use the RGB IN 2 terminal if plug & play does not operate correctly.

# OPERATIONS

## Power ON

1. Check that the power cord is connected correctly.
2. Set the power switch to [I]. The standby mode is selected, and the POWER indicator is turned to orange.
3. Press the STANDBY/ON button (Ⓜ) on the control panel or the remote control transmitter. Warm-up begins and the POWER indicator blinks in green.
4. The POWER indicator ceases blinking and turns to green when power is on. Open the slide lens door.
5. Adjust picture size using the zoom knob.
6. Adjust focus using the focus ring .

## Power OFF

1. Press the STANDBY/ON button (Ⓜ) on the control panel or the remote controller. Then, the message "Power off?" will appear on the screen, and the message will disappear by any operation or no operation for 5 seconds. During this message indication, press the STANDBY/ON (Ⓜ) button again. The projector lamp is extinguished and lamp cooling begins. The POWER indicator blinks orange during lamp cooling. Pressing the STANDBY/ON button (Ⓜ) has no effect while the POWER indicator is blinking.
2. The system assumes the Standby mode when cooling is complete, and the POWER indicator ceases blinking and changes to orange. Check that the indicator is orange and set the power switch to [O].
3. The POWER indicator is extinguished when power is off. Do not forget to close the lens door.

**⚠ WARNING • Please read this manual, and the "Product Safety Guide" thoroughly before using the equipment. Always ensure that the equipment is used safely.**

- NOTE** • Except in emergencies, follow the above-mentioned procedure for turning power off. Incorrect procedure will reduce the life of the projector lamp and LCD panel.
- To prevent any trouble, turn on/off the projector when the computer or video tape recorder is OFF. Providing a RS-232C cable is connected, turn on the computer before the projector.
  - When a projector continues projecting the same image, the image may remain as an afterimage. Please do not project the image same for a long time.

**HIGH VOLTAGE  
HIGH TEMPERATURE  
HIGH PRESSURE**

Contact your dealer before replacing the lamp.

For the optional lamp, see the item “ACCESSORIES” of P.24.

Before replacing the lamp, switch power OFF, remove the power cord from the power outlet, and wait approximately 45 minutes until the lamp has cooled. The lamp may explode if handled at high temperatures.

**⚠ WARNING** • For disposal of used lamp, treat according to the instruction of community authorities.

- Since the lamp is made of glass, do not apply shock to it and do not scratch it.
- Also, do not use old lamp. This could also cause explosion of the lamp.
- Premature lamp failure MAY be caused by an electronic component in the projector and not necessarily the lamp. If unsure contact your local service center.
- If it is probable that the lamp has exploded (explosive sound is heard), disconnect the power plug from the power outlet and ask your dealer to replace lamp. The lamp is covered by front glass, but in rare cases, the reflector and the inside of the projector may be damaged by scattered broken pieces of glass, and broken pieces could cause injury when being handled.
- Do not use the projector with the lamp cover removed.

### Lamp Life

Projector lamps have a finite life. The image will become darker, and hues will become weaker, after a lamp has been used for a long period of time.

Replace the lamp if the LAMP indicator is red, or the CHANGE THE LAMP message appears when the projector is switched ON. See Table 9 of P.20 and Table 10 of P.21.

**NOTE** • The LAMP indicator is also red when the lamp unit reaches high temperature. Before replacing the lamp, switch power OFF, wait approximately 20 minutes, and switch power ON again. If the LAMP indicator is still red, replace the lamp.

# MAINTENANCE (continued)

## Replacing the Lamp

1. Switch the projector OFF, remove the power cord from the power outlet, and wait at least 45 minutes for the unit to cool.
2. Prepare a new lamp.
3. Check that the projector has cooled sufficiently, and gently turn it upside down.
4. Loosen the two screws as shown in the diagram, and remove the lamp cover.
5. Loosen the three screws, and gently remove the lamp while holding the grips. Touching the inside of the lamp case may result in uneven coloring.
6. Install the new lamp and tighten the three screws firmly. Also steadily push the opposite side of the screwed lamp into the unit.
7. Replace the lamp cover in position and tighten the two screws firmly.
8. Gently turn the projector right-side up.

**CAUTION** • Ensure that screws are tightened properly. Screws not tightened fully may result in injury or accidents.  
• Do not use the projector with the lamp cover removed.

## Resetting the Lamp Timer

Reset the lamp timer after replacing the lamp. When the lamp has been replaced after the LAMP indicator is red, or the CHANGE THE LAMP message is displayed, complete the following operation within ten minutes of switching power ON. The power will be turned off automatically in over 10 minutes.

1. Switch power ON, and press the RESET button, for approximately three seconds. The 'LAMP xxxx hr' message will appear on the lamp timer on the bottom of the screen.
2. Press the MENU button on the remote control transmitter, or the RESET button on the control panel, while the lamp timer is displayed. The 'LAMP xxxx □ → 0 ■ CANCEL' message will then appear.
3. Press the  and select 0, and wait until the timer display is cleared.

**NOTE** • Do not reset the lamp timer without replacing the lamp. Reset the lamp timer always when replacing the lamp. The message functions will not operate properly if the lamp timer is not reset correctly.

# MAINTENANCE (continued)

## Air Filter

### Cleaning the air Filter

The air filter should be cleaned as described below at intervals of approximately 100 hours.

1. Switch the projector power supply OFF, and remove the power cord from the power outlet.
2. Clean the air filter with a vacuum cleaner.

### Replacing the Air Filter

Replace the air filter if contamination cannot be removed, or if it is damaged.

1. Remove the filter cover.
2. Remove the old filter.
3. Set the new filter and the filter cover.

**CAUTION** • Switch power OFF and remove the power cord from the power outlet before beginning maintenance work. Please read the “Product Safety Guide” thoroughly to ensure that maintenance is performed correctly.

- Replace the air filter if contamination cannot be removed, or if it is damaged. Contact your dealer in such case. For the optional air filter, see the item “ACCESSORIES” of P.24.
- Do not use the equipment with the air filter removed.
- When the air filter is clogged with dust etc. the power supply is switched OFF automatically to prevent the temperature rising inside the projector.

## Other Maintenance

### Maintenance Inside the Equipment

For safety reasons, ensure that the equipment is cleaned and checked by the dealer once every two years. Maintaining the equipment by yourself is dangerous.

### Cleaning the Lens

Gently wipe the lens with lens cleaning paper. Do not touch the lens with your hands.

### Cleaning the Cabinet and Remote control transmitter

Gently wipe with a soft cloth. If dirt and stains etc. are not easily removed, use a soft cloth dampened with water, or water and a neutral detergent, and wipe dry with a soft, dry cloth.

**CAUTION** • Switch power OFF and remove the power cord from the power outlet before beginning maintenance work. Please read the “Product Safety Guide” thoroughly to ensure that maintenance is performed correctly.

- Do not use detergents or chemicals other than those noted above (e.g. benzene or thinners).
- Do not use cleaning sprays.
- Do not rub with hard materials, or tap the equipment.

## Symptom

Before requesting repair, check in accordance with the following chart. If the situation cannot be corrected, then contact your dealer.

**Table 11. Symptom**

Symptom	Possible cause	Remedy	Page
The power is not turned on.	The main power switch is not turned on.	Turn on the main power switch.	8,9
	The power cord is disconnected.	Plug the power cord into an AC power outlet.	
No video or audio.	The input is not correctly set.	Use the projector or remote control transmitter to set.	10
	No signal input.	Connect correctly.	7,8
Video is present but no audio.	The projector is not correctly connected.	Connect correctly.	7,8
	The volume is set to minimum.	Press VOLUME $\ominus$ on the remote control or display the menu screen and adjust the volume.	11,15
	Mute is turned on.	Press the MUTE $\text{M}$ button.	11
Audio is present but no video.	The projector is not correctly connected.	Connect correctly.	7,8
	The brightness adjustment knob is rotated fully clockwise.	Select BRIGHT with the MENU button and the press the $\ominus$ button.	12
	The lens cap is still attached.	Remove the lens cap.	9
Colors are pale and color matching is poor.	Color density and color matching are not correctly adjusted.	Adjust the video.	12
Images are dark.	Brightness and contrast are not correctly adjusted.	Adjust the video.	12
	The lamp is nearing the end of its service life.	Replace with a new lamp.	17
	WHISPER mode is set.	Clear WHISPER mode.	15
Video is blurred.	Focus or H PHASE is out of adjustment.	Adjust the focus or H PHASE.	9,12
